

October 2022

Green Earth Technology

Many Whatcom Residents load our yard waste and food waste into our SSC Recycling bins.

Have you ever wondered where it goes and how it is processed?

Well, we have answers for you.

Come to the meeting and hear a presentation from Stephanie at Green Earth Technology. They handle all of our stuff and turn out great compost.

**The technology that Green Earth uses is absolutely amazing.**

Their Feb 2020 talk on their process, technology and handling literally blew away my misconceptions. Its time for a repeat talk to re-acquaint and update us on their critical operation.
